

**OPTUS SATELLITE**

SATSLEEVE+ AND SATSLEEVE HOTSPOT

**OPTUS** *yes*

# THE SATSLEEVE LETS YOU STAY CONNECTED NO MATTER WHERE IN AUSTRALIA YOU ARE

## IT'S THE SIMPLE, EASY AND NO-FUSS WAY TO TURN YOUR SMARTPHONE INTO A SATELLITE PHONE

Optus Satellite's Thuraya SatSleeve+ and SatSleeve Hotspot can easily transform your iOS or Android smartphone or tablet into a satellite device. And the best thing? As long as you have a line of sight to the satellite, you'll be able to keep in touch right across Australia, with 100% coverage wherever you are.

The SatSleeve comes in two options – the SatSleeve+, which lets you dock your smartphone to the SatSleeve with a universal adaptor so you can walk-and-talk, and the SatSleeve Hotspot, which is ideal if you prefer to use the SatSleeve as a satellite Wi-Fi hotspot for your smartphone or even your tablet.

So whichever option you choose, the SatSleeve from Optus Satellite lets you keep in touch with voice, SMS and data, all whilst using your favourite device! And as Australia's leading satellite provider, our expertise knowledge and support will be there for you every step of the way.

#### Want more info?

- The Optus Thuraya SatSleeve+ and SatSleeve Hotspot are compatible with selected iOS and Android devices only.
- The SatSleeve+ smartphone adaptor can hold smartphones from 58-85mm in width. The Satellite Hotspot usually has a WiFi range of 30 metres or less.
- The Thuraya Satellite Service is not guaranteed in any location even while in the Thuraya coverage area. This is because satellite calls require a clear line of sight to a Thuraya satellite, with no obstructions.
- The Thuraya SatSleeve requires its own SIM card and phone number.
- You'll need to connect your device to the SatSleeve and download the SatSleeve app free from the Apple App Store or Google Play Store, whilst you are in a 3G/4G mobile coverage area.
- Emergency Dialling may not operate in all locations or countries overseas when in Satellite Mode (as per international roaming)

- Satellite calling requires the Australian area code for local landline numbers. For example, 02 for a NSW number
- Sending and receiving SMS between other Australian carriers (eg. Telstra or Vodafone) and other satellite or international carriers (eg. Inmarsat or Iridium) is not guaranteed.
- Satellite to satellite calls cannot restrict CLI.
- The Thuraya SatSleeve does not support MMS, video calling, 1900 services, and premium SMS (PSMS)
- For additional limitations or other information about this service, refer to our Standard Agreement at [optus.com.au/standardagreements](http://optus.com.au/standardagreements)
