

SAT15

INFORMATION ABOUT THE SERVICE

Description of the Service

The Sat15 is for Thuraya Satellite Postpaid Mobile Services. The service uses a Thuraya satellite handset or device, and operates on the Thuraya satellite network. Depending on the handset or device selected, you can use the service on either the satellite network only, or switch between the Satellite network (Satellite Mode) and Optus 2G network (GSM Mode).

Mandatory goods

You need a Thuraya satellite mobile handset or device to use this service. It is possible to bring your own Thuraya Satellite mobile handset for use with this service or you can purchase one from us.

The cost of a Thuraya XT-LITE satellite mobile handset purchased from Optus starts at \$700. This phone can only be used in Satellite Mode. Data is not available on this device.

The Thuraya XT Dual satellite mobile handset purchased from Optus can be used in both GSM and Satellite Mode.

The cost of a Thuraya SatSleeve+ and SatSleeve Hotspot purchased from Optus starts at \$888, and are available for most Apple and Android devices. All SatSleeve devices can only be used in Satellite Mode.

Optus Thuraya Service Important Information

The Thuraya Satellite Service is not guaranteed in any location even while in the Thuraya coverage area. This is because satellite calls require a clear line of sight to a Thuraya satellite. Obstructions such as buildings, heavy tree coverage, or people may restrict the signal. For coverage details please see optus.com.au/coverage

- > To use the Thuraya Satellite Service, you must have International Roaming activated
- > When in Satellite Mode, Emergency Dialling is not possible without an active Optus Thuraya SIM card in the handset
- > Emergency Dialling may not be possible while the keypad is locked
- > Emergency Dialling may not operate in all locations or countries overseas when in Satellite Mode
- > Satellite calls are charged in 30 second increments. Data is charged in 10KB increments.
- > Satellite calling requires the Australian area code for local landline numbers. eg 02 for a NSW number
- > When your phone is in Satellite mode, we cannot guarantee that sending and receiving SMS between other Australian carriers or other satellite or international carriers (such as Globalstar, Inmarsat or Iridium) will work
- > Satellite to satellite calls cannot restrict Calling Line Identification (CLI)
- > MMS, 1900 services, Premium SMS and Restricted Access services are not available in Satellite Mode
- > You can't use the Thuraya handset to make video calls

Minimum Term

The Sat15 plan is available on a month-to-month contract.

The minimum total cost is **\$15** for the first month.

Charges for other usage types can be found at optus.com.au/standardagreements
