### Information about the service

**Eligibility**
This plan is only available to new and re-contracting services. You cannot rate plan change onto this plan.

**How your plan works**
If you use more than your included data during your billing month (either on your mobile phone or any connected mobile/mobile broadband device), we’ll automatically give you another 1GB for $10. Each time you use all of your data inclusion we’ll give you another 1GB for $10, up to a maximum of 150GB additional data on one account per month. Your service may then be restricted or we may continue to charge you at these rates.

At the end of your billing month, you’ll automatically be moved back to your plan’s inclusions and charges.

**Minimum term**
It’s available on a 24 month contract. The Minimum Total Cost is $2,400 over 24 months (excluding any handset repayments).

**New Phone Trade Up**
This plan includes the option of New Phone Trade Up. So after 12 months on this plan, you have the option to pay a one-off fee of $99, return your original mobile handset to Optus in good working order and purchase a new mobile handset on a new 24 month plan. You will also need to sign a separate agreement with our second hand vendor to transfer ownership of your original mobile handset. Alternatively, if you wish to keep your original mobile handset, you can simply pay out the full remaining cost of your mobile handset, including any monthly handset credit that Optus was going to cover. You are under no obligation to use the New Phone Trade Up option and this option is only available to new and recontracting customers from 11 March 2016. For further information please go to optus.com.au/newphonetradeup

**Data Pool**
If you have more than one My Plan Plus (including SIM Only), My Plan Business (including SIM Only & Tech Fund), My Mobile Broadband Plus or Mobile Broadband Business plan on the same billing account, the included monthly data allowance will combine into one data pool, which will be shared by all the eligible services on that account. Any unused data in the data pool expires at the end of each billing month.

Services that share data may have a service login to My Account which will display all service numbers contributing to or using the shared data pool on the account, and the amount each service has used.
