### Service and plan availability

Optus Broadband services are not available in all areas or to all premises. The broadband service offered will be determined by what is available at your location. Optus Broadband services are only available at premises which can be physically connected to the Optus Network and, in the case of Optus nbn, where connection will be possible within three months based on rollout information provided by the nbn which is subject to change. There may be technical or commercial reasons that affect our ability to connect a service at your address. Until Optus successfully installs your service we cannot guarantee that the service can be installed at your address. To check your serviceability and find out what kind of Optus Broadband is available at your address visit [optus.com.au/serviceabilitycheck](https://optus.com.au/serviceabilitycheck)

### Equipment needs

You need a compatible broadband modem to use this service. The modem must be an Optus approved device. If you are a new Optus Broadband customer, we will provide you with a WiFi modem on a Device Payment Plan as part of your plan. The cost of the modem is covered by Optus if you stay connected on an eligible Fixed Broadband plan for 36 months.

### Service limitations

This service may not be suitable if you have a serious illness or condition and require an uninterrupted service. Some equipment like back-to-base and medical alarms and other devices may not be compatible with the nbn or 4G backup service and are not tested by us or supported on Optus nbn. You should contact your device supplier to find out if your device will work before connecting to the nbn.

### Accessibility

For info about products and services we offer for customers with differing abilities, please see [optus.com.au/about/inclusion-diversity/differing-abilities/disability-services](https://optus.com.au/about/inclusion-diversity/differing-abilities/disability-services)

### Device Payment Plans

You can buy an eligible device (such as a Booster) on a Device Payment Plan (DPP) and pay for it over a selected term by monthly instalments. You will need to remain on this broadband plan or other eligible plan for the term of your DPP. If you cancel your plan or move to an ineligible plan, your related DPP will also be cancelled. See "Cancellation" (page 2) for more detail.

### System requirements

To use the Optus Broadband service you need to ensure your device is compatible. Please see [optus.com.au/systemcompatible](https://optus.com.au/systemcompatible)

### Installation

Optus reserves the right to charge for non-standard installations. You must obtain permission from the owner of the property, if that's not you, to have Optus Broadband installed, and have someone over 18 years of age in attendance at the appointment. If you're in a new development and not already connected to the nbn, NBN Co may charge \$300 to connect your premises to the nbn. If applicable, we will bill that charge to you.

You may need two technicians (one Optus, one nbn) to install the service. If applicable, we will send you an Optus self-installation kit. Installation fees may apply if you request a technician installation where a self-install option is available. If you require assistance to connect, contact us at [yesopt.us/chat2us](https://yesopt.us/chat2us)

Optus is required by law to confirm your nbn service is working. We may not be able to confirm this if you do not use the modem that Optus supplies you. You'll need to tell Optus of any issues you have with your nbn service before we can rectify them. Billing will be activated once we confirm your nbn broadband service is operational.

nbn FTTC and HFC: If you are an Optus nbn FTTC or HFC customer and fail to plug in the equipment within the specified timeframes, NBN Co may cancel your order.

### nbn™ speed

For customers connecting to this plan on the nbn™ the default speed included is 'Premium Evening Speed'. Changing to a higher speed pack is available for this plan. Subject to line speed capability. Information about nbn speeds is available at [optus.com.au/shop/broadband/home-broadband/nbn-speed-packs](https://optus.com.au/shop/broadband/home-broadband/nbn-speed-packs) FTTN, FTTB and FTTC maximum line speeds will be confirmed after activation.

Typical Evening Speeds/Typical Busy Period Speeds are based on customer averages and are not a guaranteed minimum.

We may change the access method for your service for the remainder of your minimum term and move you to:
