The NETGEAR® CG300 v2 gateway delivers long range wireless performance

The NETGEAR® CG300 v2 gateway is an advanced gateway product with 8x4 and combines two analog voice lines, a 4-port Gigabit router, and high power N450 3x3 wireless access point into a single device capable of supporting both home and small office applications.

CG3000v2 provides up to 450Mbps on the wireless link speed. It supports a wide range of features and applications such as ReadySHARE® and NETGEAR genie®. Improved wireless range delivers better connections for larger homes and multiple devices, while four Gigabit Ethernet ports offer ultra-fast wired connectivity. One USB port enables faster USB access speeds for wireless access to connected hard drives. The CG3000 v2 offers complete support for a variety of voice codecs, including HD Voice support, as well as multiple call signaling protocols including NCS, Legacy SIP, and PacketCable 2.0 IMS.

NETGEAR Enhanced Support Tools offer easy troubleshooting for Cable Operators providing unprecedented visibility and diagnostic tools to ensure carrier-grade voice services.
